**MOLDED BASKETBALL CONSTRUCTION**
A type of basketball where the entire outer surface is produced together with the molding of the carcass. This technique is used with our outdoor basketballs.

CARCASS and COVER Provides structure for the inner components. With high-end rubber balls, a coat of paint is applied to enhance a better grip and look.

---

**LAMINATED BASKETBALL CONSTRUCTION**
A type of basketball where panels of leather, composite leather or synthetics are fixed onto a rubber carcass by hand. This technique is used for our indoor and indoor/outdoor basketballs.

COVER provides good grip, feel and aesthetic appeal to the ball as well as necessary strength and abrasion resistance.

CARCASS provides structure for the inner components.

---

**LEGACY**
ZK Material: This exclusive material with advanced moisture management control is engineered for high caliber indoor play. The soft carcass and deep channel design gives this ball a softer feel and improved grip.

The COVER material provides superior grip and soft feel while maintaining Spalding’s rigorous standards for material strength and abrasion resistance.

The CARCASS provides structure, shape and protection for the inner components.

---

**TECHNOLOGY**

**WINDINGS**
